- NEEDED FOR INSTALLATION:**
- 5/64" allen wrench
 - Wire connectors
 - Hammer
 - Phillips screwdriver

By Others

IMPORTANT SAFETY INFORMATION - READ, FOLLOW, AND SAVE ALL SAFETY AND INSTALLATION INSTRUCTIONS

- Product must be installed by a qualified person in a manner consistent with its intended use and in compliance with the National Electrical Code, Canadian Electrical Code, and all Local and Provincial Codes.
- Follow product label information and instructions.
- Qualified Personnel must perform all servicing or relamping of this product.
- Before wiring to power supply and during servicing or relamping, turn off power at fuse or circuit breaker before service.
- The use of accessory equipment not recommended by the manufacturer or installed contrary to instructions may cause an unsafe condition. The use of damaged components may cause an unsafe condition and void product warranty.
- Do not block light emanating from product in whole or part, as this may cause an unsafe condition.
- Never operate the fixture with missing or damaged lens. Lens must be cleaned on regular basis.
- Energized lamp gets hot very quickly. Allow it to cool before service.
- Entire fixture may become extremely hot. Do not touch hot lens or fixture body. Do not touch the lamp at any time. Use a clean, dry, soft cloth to handle the lamp. Oil from skin may damage the lamp and cause it to rupture.
- Replace lamp only with correct wattage and type of lamp marked on fixture label.
- All gaskets, o-rings and sealing surfaces must be kept clean during installation and service; failure to do this may cause an unsafe condition and void product warranty.

* UPM is covered in whole or in part by US patent #6,940,012

1. Remove Patented Knockout(s) as necessary from the inside of the UPM housing. Leave remaining unused knockouts in place to maintain seal.

NOTE: Patented design featuring a silicone 'O' Ring allowing knockout to be tapped back into place to renew seal integrity.

2. Use adjustable strap provided to attach UPM housing to tree. Tighten by pulling on the adjustable strap until secure.

3. **Optional Step on PM1 & PM2:** Thread safety cable through hole on the back of the UPM housing. Feed safety cable through opposing ends of the connector. Pull on wires to assure the connection is secure. Leave enough slack in safety cable for tree growth. Adjustments can be made by pressing release spring with a pin or 3/64" allen tool.

4. Connect 1/2" conduit connector through female threaded conduit entry.

⚠ NOTE: Surface conduit is a common entrance for water if not properly sealed. Seal connector threads and conduit pipe with a suitable sealant (Teflon tape, adhesive, etc). Sealing the conduit after knockouts are removed is required to maintain warranty.

5. Pull branch circuit wiring necessary for installation (By Others.)

6. Use wire connectors (By Others) to connect transformer primary leads to branch circuit wires. Connect incoming ground to ground wire provided in UPM housing. See wiring diagram.

Wiring Diagram.

7. Remove the backing from adhesive tape on transformer, place in bottom of UPM body void of any wiring and press firmly for five seconds to ensure good contact.

8. Attach tether wire under screw head at the base of the UPM housing and tighten. Slowly lower the faceplate until tether is taut.

⚠ NOTE: Faceplate tether supplied with UPM is designed as an installation aid and NOT a safety cable. Do not add weight to, or drop faceplate.

9. Connect transformer secondary leads to lamp leads using pre-wired factory connector.

10. Make sure UPM body gasket is free of any dirt or debris. Attach the faceplate by tightening the (4) #6-32 captive screws evenly to 6-9 in/lbs using a 5/64" allen wrench.
