Construction Features

Material: Shields constructed of heavy gauge, die-formed, 5052 aluminum, with less than 1% copper content. Lexan Shield (LXS) constructed of impact and UV resistant 1/8" clear polycarbonate.

Mounting: All shields are factory-installed onto the fixture's door assembly.

Hardware: All external hardware is stainless steel, aluminum or hot dip galvanized.

Finish: Polyester powder coated finish, fired at high temperatures to produce a durable weatherproof coating. All shields finished in matte black unless noted otherwise in **How To Order** section of product sheet. Lexan Shield (LXS) is clear.
